

While history offers a rich cultural heritage - an array of jewels built by Renaissance architects, like Villa Filipa, the present can offer almost anything that a demanding guest can desire. Villa is set in the tranquil harbor of Cavtat, which has been restored with great care, beautifully converted to recreate a property of unique charm and quality. This Villa is one of the oldest buildings in the region, whose foundations contain remains of walls and ceramic originating from ancient Epidaurum.

The old original chapel, smoke house, wine cellar, open terrace with renaissance columns, to give Villa Filipa a warm, welcoming and exclusive atmosphere. Either side of a manicured lawn, planted with orange groves and bay leaf trees. The property is surrounded by 2,5 m high walls, with an entrance just off the old town harbor of Cavtat.
